DURST SOFTWARE & SOLUTIONS

A revolutionary software eco-system that covers all relevant aspects of your printing business – open and modular.

Durst Software & Solutions offers smart and simple software solutions to streamline the process “From Pixel to Output”. The solutions which are specifically tailored to digital printing – from initial file creation through prepress to production and final analysis – help improve your printing production processes and simplify your business. Consulting and training services tailored to your specific needs will help you to achieve optimized work processes.

The Durst software is modular and can be flexibly adapted to your needs – from a simple stand-alone solution to a fully integrated system.

All products are individually expandable and can be used for large format, label, corrugated, and textile printing.

PRODUCT OVERVIEW

ERP/MIS Durst Lift ERP

Durst Lift ERP is a print specific cloud-based ERP system that automates all processes within your printing company and provides a transparent, paperless and interactive experience for you and your customers. A configurable

software suite to keep your print shop running lean and efficient. Streamline your business from quote to delivery with Lift ERP.

WEB-TO-PRINT Durst Smart Shop & Editor

Durst Smart Shop is an innovative web-to-print solution designed for the printing industry. From the online sale of products with print specific attributes to the print-ready PDF file: a global solution to address target specific groups, get new customers and offer them unlimited personalization options with the online editor, Durst Smart Editor.

Durst Smart Editor is a cloud-based application that allows personalized print products to be designed directly in the web-browser. It is easy to integrate into your existing web shop via API. Allow your customers to get exactly what they want with real-time product customization and realistic previews and receive their orders as a print-ready files.

PREPRESS & PRODUCTION Durst Workflow

A browser-based software solution that combines prepress and production automation tasks. File checking, data preparation, color management, ink and media saving and much more. Durst Workflow is the ideal toolbox to ensure an efficient production flow with optimal

results in the shortest time. Generate print predictable files, manage your process according to your production requirements and get real time feedback on the current status with Durst Workflow.

DATA & TRANSPARENCY Durst Analytics

The analytics software designed for your Durst printer to allow data-driven decisions. Customized dashboards with key performance information, production timelines, detailed job information as well as KPI reports.

Spare part conditions are also effortlessly checked to allow preventive maintenance operations. Increase your productivity and keep your equipment under control with Durst Analytics.

DURST SMART FACTORY

A smooth path to peak performance with Durst's software and solutions.

The Smart Factory approach from Durst is about providing a holistic product portfolio with accompanying services,

designed for 360° business solutions, offering not just the printing systems themselves but e-commerce, PDF workflow, ERP, analytics, consulting, integration services, and training. This scalable approach enables your business ideas and innovations.

CUSTOMER EXPERIENCE

Engage your customers with digital touchpoints along the entire sales and fulfillment process. As you implement services such as online shops, dedicated customer portals, order tracking, instant notifications on mobile devices, and automated approval processes, your customers will thank you with many (re)orders.

PROCESS AUTOMATION

Complete automation of repetitive tasks gives you more time for the creative work. Paperless production and embedded quality assurance will increase your internal efficiency, while faster turnaround times and transparent order status information will excite your clients.

PRODUCTION LINE AUTOMATION

A digital workflow increases productivity, reduces error rates and any necessary reprints through defined file preparation and balanced color calibration between all printers.

DATA-DRIVEN BUSINESS OPTIMIZATION

Digital processes provide data and the corresponding history. This is the basis for any kind of improvement, whether in sales, process efficiency and speed, quality, or maintenance; they all result in lower operating costs and higher revenues.

Take the next step towards the Smart Factory with Durst Software & Solutions!
